Our Story	29

What makes a house a home?

The Kiwi DIY spirit is driven by the desire to shape our environment, to have our indoor and outdoor living spaces reflect our best lives.

Here at Genia, we've made it our business to understand how to make your home and outdoor areas work for you. Over the years, our range of products has expanded to meet your changing needs. It's been our pleasure to grow our family-owned business alongside households nationwide.

As a Kiwi-owned and grown company, we're proud to display the Buy New Zealand Made brand. When you see this logo, you can trust our products are manufactured in New Zealand, of high quality and produced safely and ethically. Genia products will help you achieve the outdoor lifestyle you deserve with a product range that is easy to use and built to last.

Whether you're embracing your traditional Kiwi right to dabble in a bit of DIY or looking to add serious value to your home, Genia understands, and we're here to help.

We are Genia.

A private sanctuary

It's about more than privacy.

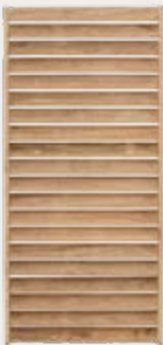

Decorative landscape panels by Genia define your outdoor entertainment spaces and enhance your natural surroundings.

Our extensive range of privacy panels are easy to install and integrate into your existing outdoor living whilst adding polish and sophistication. You deserve more than just privacy – create your own sanctuary.

Privacy screens come in styles to suit every home: traditional lattice or contemporary horizontal or vertical slats. Genia’s range offers endless creative possibilities. Take a look at our louvre panels if you’re after a solution that plays to the light and shade around your space.

Our range

Did you know Genia can create custom-built panels? Visit our Trelli app to plan, personalise and get a quote for easy ordering.

To learn more about Trelli go to page 8.

EXPERT RECOMMENDATION:

When choosing a colour for stain or paint, remember that darker colour panels blend into the surrounding foliage and weather better, requiring less maintenance. A lighter colour will frame a space and offer a polished final effect.

Don't forget you need solid, hard-wearing posts to support your privacy panels. Read about our StayStraight engineered posts on page 18.

Custom-made to fit your plans

Trelli.co.nz is Genia's own online portal, designed to help you plan your project and customise our range as needed.

Trelli allows you to receive an instant quote estimate on your custom product. You can take your quote to your favourite hardware store who can place the order directly from us.

Check out trelli.co.nz – it's as easy as 1, 2, 3.

Trelli helps us to work closely with our retail hardware partners to give our customers a better service. Our retailers carry standard sizes for our product range, Trelli allows you easy access to custom-made options.

Trelli takes some of the legwork and guesswork out of your next DIY landscaping project. You can see a detailed render of your customised product before placing an order.

If you need to speak with a member of our team at any stage, we're just a phone call away!

Give trelli.co.nz a go. We'd love to know how it has worked for you.

Style, charm and
street appeal

Eye-catching and enduring, picket fences create a stunning first impression, enhancing the appearance of your home.

Genia's range of pickets, palings, balusters, gates and fence topper will surround your home and garden with style. Giving you a sense of security whilst showcasing your home and garden.

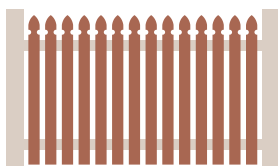

Made from sustainably managed New Zealand radiata pine, our pickets come in four profiles. Whether traditional or contemporary, there's a picket fence to match your vision for your home and garden.

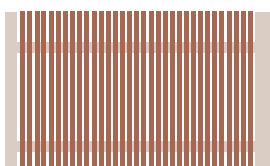

Installation tips:

Picket fence

Baluster fence*

Talk to your preferred hardware store team to ensure you pick up all the materials you need to install your fence correctly.

* go to page 18 for more information on our balusters.

90mm x 19mm x 1500mm

90mm x 19mm x 1800mm

EXPERT RECOMMENDATION:

Staining or painting your timber products can prolong their lifespan and add flair to your project. Talk to your retailer about the finishing products that offer the best protection for your project.

Use strong and reliable posts to give your fence a sound structure. Find out about our StayStraight premium H5 posts on page 18.

Welcome home

That comforting sense of safety and security starts at your home's front gate.

Explore Genia's range of New Zealand-made timber gates to create an inviting entrance for your family and guests.

With its clean, bold profile, our square gate range fits modern and contemporary architecture. Our round profile gate offers a softer shape to complement the curves of your garden and surrounding trees. Genia's gothic gate profile is an ideal choice to compliment New Zealand's Victorian-era villas and Californian bungalow styles.

Installation tips:

Ask the team at your preferred hardware store for the materials you need to deliver the best, long-lasting gate installation possible.

Your crowning
achievement

Take your fence plans and top them off with Genia's fence toppers for a project your neighbours will admire and envy.

Get the foundation elements of your fence right but don't stop there. Genia's range of fence toppers are hard-wearing and will ensure your new fence is stylish and built to last. Designed alongside our range of panels and privacy screens our fence toppers are easy to install.

Framed lattice design or perhaps a more modern horizontal slat panel? Topping off your fence with that something extra will improve privacy and deliver a desirable, polished street appeal.

Installation tips:

Ask your preferred hardware store for information on what you need for the installation.

Fence toppers

Preservative treated H3.2

38mm x 12mm batten

45mm x 45mm capping

Available sizes (H x W):

300mm x 2400mm

600mm x 2400mm

EXPERT RECOMMENDATION:

When planning your fence toppers, ensure sufficient length in your posts to accommodate the additional height required. Find out about our StayStraight premium H5 posts on page 18.

Strong, silent
and dependable

You have to have the basic foundation in place before you can focus on the look and details of your project.

Think of our post and balusters as the robust and quiet high performers in your outdoor project. Posts serve as the sturdy backbone for the outdoor structure, whether it's a fence, gate, panel or trellis installation.

Genia StayStraight posts are finger jointed and laminated. Finger-jointing ensures that only quality timber is included in the post whilst providing superior strength. Laminating prevents twisting and warping. The result is a superior high performing post, ideal for your outdoor projects.

Genia balusters serve an important safety function, helping to keep people safe around outdoor deck and patio areas. Genia balusters also serve as a smart looking fencing solution, for a clean modern look.

Premium Engineered GL8 H5 Posts

Our StayStraight Posts are suitable for various landscape applications such as fence posts and general landscaping.

In structural applications, StayStraight posts should be installed on suitable steel brackets above ground and painted with an appropriate system.

New Zealand radiata pine

Preservative treated H5

Dressed 4 sides

Finger-jointed and laminated for stability

Kiln dried

Ready to paint or stain

Available sizes: 88mm, 112mm and 132mm

Available lengths: 2400mm, 2700mm and 3000mm

EXPERT RECOMMENDATION:

Always get a handle on the safety requirements of the exterior project, first and foremost!

Refer to the New Zealand building code to check what codes of compliance might apply to your build.

Requirements can vary depending on your local council land and building codes.

Balusters

Add value and style to your stairways, railing systems and outdoor living areas.

Made from New Zealand radiata pine, our balusters and balustrade range are perfect for enclosing outdoor areas, such as decks and pools, and provide a modern alternative fencing option.

Our Story

We are Genia, a family-owned business at the forefront of New Zealand's timber sector since 1870.

Our home base is in Motueka, a beautiful region of Aotearoa, New Zealand, located at the top of the country's South Island.

Our core business is the processing of New Zealand-grown radiata pine into product ranges that will help build and enhance Kiwi homes and communities. We've been operating in the timber industry for 150 years and counting, and today our Genia family has grown to a team of more than 130 representatives.

We're proud of our history, with five generations of the family behind Genia. Our customers and partners know that we love what we do and that, after all this time, we continue to nurture our passion for timber products.

Experience has taught us to invest in great design and intelligent engineering because this will deliver products that can satisfy the evolving needs of our partners and customers.

When you buy Genia products, you see our company values in action - an eye for detail, robust operational and logistical capabilities, and always supported by a responsive, caring team who pride themselves on delivering the best service.

Reliability, expertise, trust and accountability drive what we do at Genia every day. These qualities are reflected in our products and people and stem from generations of hard work and Kiwi innovation.

We are Genia.
